

The NZDA Research Foundation...

...invites applications for grants to support research in fields related to dentistry.

In particular, the Foundation wishes to promote research in clinical dentistry and dental practice. It encourages applications from practitioners, particularly those who have conducted summer research projects or who were otherwise involved in research projects during their formal education.

The Foundation board will consider applications for funds to support new or ongoing projects, to purchase equipment, or for any other purpose that will result in the acquisition and/or dissemination of new knowledge relevant to dentistry.

The Foundation offers assistance to dental practitioners in the preparation of research protocols and in developing their research application to ensure compliance with current grant application techniques. Enquiries should be made to the Foundation, via the NZDA Associate Director, who will provide names of experienced researchers willing to provide such guidance. For university-based researchers unfamiliar with current grant application techniques, the Foundation strongly recommends they consult with their research supervisor/s and/or senior research colleagues.

Recipients of the NZDA Research Foundation awards for 2011 were: Dr R Cannon, Dr J Antoun, Prof M Farella, Dr D Coates, Dr H De Silva, Dr J Tagg, Dr J Tyndall, Dr Y Lim, Dr A Tawse-Smith and Dr J Liu.

Additional research awards: one RC Tonkin Summer Studentship 2011/12 (\$5000) and two Sir John Walsh Summer Studentships 2011/12 (\$5000 each); and one NZ Dental Research Foundation Prize 2012 (\$1000).

Application Guidelines can be downloaded from the NZDA website, or obtained from:
